ITRACT aims to improve the connectivity and accessibility of remote areas in the North Sea Region through the integration of innovative transport and communication infrastructure. ITRACT will focus on the development and use of novel ICT applications and brings together technology experts - in the fields of ICT, satellite, wireless broadband and sensor technology - with socio-economic experts.

“Our aim is to create sustainable and inclusive regional economies and communities throughout the North Sea Region by improving the virtual and physical modes of transport on a large scale.”

The ITRACT partners are:

External funding from

The Interreg IVB North Sea Region Programme

Investing in the future by working together for a sustainable and competitive region
